

Swapnil Patil

Full Stack Developer & DevOps Engineer

Backend Engineer & AI enthusiast with 2+ years building production-grade APIs, intelligent agent systems, and cloud-native infrastructure — turning complex challenges into clean, scalable solutions.

PROFESSIONAL EXPERIENCE

Associate Engineer · Arieotech Solutions

Jan 2023 — Present · 2+ Years

 Pune, India Full-time

- Built and maintained **full-stack web applications** using React and .NET Core, serving **10,000+ active users**
- Designed **RESTful APIs and microservices**, improving system modularity by **40%**
- Managed **CI/CD pipelines on Azure DevOps**, cutting deployment time from hours to under **15 minutes**
- Architected cloud infrastructure on **AWS & GCP** maintaining **99.9% uptime SLA**
- Optimized SQL queries achieving **35% reduction** in average response time
- Built **AI-powered Python agents** integrated with LLM providers via LiteLLM

FEATURED PROJECTS

AI System Design Simulator AI / Agents

An intelligent multi-agent simulator that models real-world system design scenarios using LLMs. Accepts architecture prompts and autonomously generates design documents, trade-off analyses, capacity estimations, and infrastructure diagrams — powered by Python AI agents and LiteLLM.

React

LangChain

OCR Project — React Full Stack + AI / Vision

A full-stack OCR web application built with React and Python. Supports image/PDF uploads, extracts text using computer vision models, and provides structured output with confidence scores. Includes a clean React UI with real-time processing feedback.

OpenCV

Tesseract

AWS S3

OpenClaw Agentic Workflow AI / Production

Designed and deployed a fully working multi-agent agentic workflow using OpenClaw — handling autonomous task routing, tool use, and LLM orchestration in production.

CERTIFICATIONS

Microsoft Azure AZ-900
Azure Fundamentals — cloud concepts, core Azure services, security, compliance, and pricing.

Microsoft Azure AZ-400
Azure DevOps Engineer Expert — CI/CD pipelines, infrastructure as code, monitoring and security practices.

KEY ACHIEVEMENTS

35%

Query Performance Boost — Optimized critical SQL queries and indexed views, reducing average response time from 800ms to 520ms.

86%

Faster Deploys — Re-architected Azure DevOps pipeline, cutting deployment time from 2 hours to 14 minutes with zero-downtime releases.

99.9% **Uptime SLA** — Designed AWS multi-AZ infrastructure with automated health checks and CloudWatch alarms.

28% **Cloud Cost Savings** — Rightsized AWS resources and implemented S3 lifecycle policies, reducing monthly cloud spend.
